

EXPERT BUILDING SERVICES

JBA CONTRACTS LTD

BUILDING | ENGINEERING | SURVEYING

DISCOVERY

With 30 years experience; JBA Contracts take full ownership of your project requirements, from start to finish, and this begins at our discovery stage. Our team of experts pay great attention to detail and ensure we have all the necessary information to produce an accurate and detailed quote.

BUILD

Our qualified team will then begin work on your project and make every effort possible to ensure your project is completed on time, within budget and to the highest possible standards and JBA Contracts guarantee that the team involved in your project's build have the knowledge and the experience to deliver this.

PLAN

Once a quote is accepted by the client, our team then begin planning, which involves the project manager determining any relevant project timelines, and then communicating these. Our team then make certain that any resources, including materials and workforce, are in place for your projects start date.

MANAGE

With JBA Contracts you will have full peace of mind with your project, we continuously communicate in order to ensure that any concerns are identified and addressed quickly. We also want to communicate with the client in order to give them a sense of confidence and any queries you may have can be dealt with correctly and promptly.

BUILDING ENGINEERING SURVEYING

Established in 1989, JBA Contracts specialise in Building and Civil Engineering works. From this position we were early to recognize the opportunity for the growth of our business within the UK Construction Industry.

COMMERCIAL

JBA Contracts have successfully completed a number of commercial projects including Queens Ferry Crossing, Edinburgh Waverley Station & Ayrshire College. We pride ourselves on the work we produce, and strive for excellence, so we ensure every commercial project we complete is done to the highest possible standards.

RESIDENTIAL

Our skilled team of experts have a wealth of experience, and have completed countless residential projects. Whether you are looking to construct a new home or carry out major renovations to existing homes, the team at JBA Contracts have the knowledge and capability to enable you to achieve your aspirations for your unique project.

RESTORATION

JBA Contracts have the ability to take on your restoration project, enabling you to restore your property to its former glory. The team have worked on a number of restoration projects which involve rebuilding and restoring stonework and brickwork. We enjoy a great sense of pride in enabling you to put a new lease of life into the things you love.

CASE STUDY

QUEENS FERRY CROSSING

JBA Contracts were involved in the major construction of the Queens Ferry Crossing which involved building masonry walls and carrying out structural alterations to the CCTV Control rooms. The works were carried out to ensure adequate structural stability of this part of the project. Our expert building knowledge carried this type of work to help aid the construction of the project.

£1.35
Billion GBP

1.7 miles
Long

The Queensferry Crossing is the longest three tower cable-stayed bridge in the world spanning 1.7 miles. The biggest infrastructure project in Scotland for a generation
